NOTICE TO THE MARKET

JBS exports to Russia

JBS informs that it has been informally advised that the Veterinary authorities of the Russian Republic have published a list of meat production establishments that have been suspended from producing product for the Russian market. The list includes 4 JBS beef production plants in Brazil as well as one each in Argentina and the USA.

The Company will continue to maintain supply to its valued customers in the Russian market through production at its other approved plants in Brazil and elsewhere while it will strive to maintain dialogue with the responsible authorities to resolve the issues at hand with a view towards resuming exports from the delisted facilities. JBS believes that the financial impact as a result should be minimal.
