

## **Notice to the Market - Production Facilities in Argentina**

JBS communicates to its shareholders and the market in general that the Company is always analyzing the best market options for its shareholders and at present in the Company's operations in Argentina, these options include reducing production due to limited cattle supply and restricted exports to the possible sale of some production units in the event that the values involved reflect the real value of the assets.

As is the Company's custom and in accordance with good corporate governance, JBS will communicate any relevant fact to the market through the correct channels.
