INDEPENDENT AUDITOR'S REVIEW REPORT ON THE INTERIM FINANCIAL INFORMATION

To the
Shareholders, Board Members and Management of
JBS S.A.
São Paulo - SP

Introduction

We were engaged to review the individual and consolidated interim financial information of **JBS S.A. ("Company")**, included in the quarterly information for the quarter ended September 30, 2017, which comprise the statement of financial position, individual and consolidated, as at September 30, 2017 and the respective statements, individual and consolidated, of income and comprehensive income for the three- and nine-month periods then ended, and of changes in equity and cash flows for the nine-month period then ended, as well as the corresponding notes to the quarterly information, including a summary of significant accounting policies.

The Company's management is responsible for the preparation of this individual and consolidated interim financial information in accordance with Technical Pronouncement CPC 21 (R1) – Interim financial statements and with International Accounting Standard (IAS) 34 - Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), and for the presentation of this interim financial information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM) applicable to the Quarterly Information. Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of the review

We conducted our review in accordance with Brazilian and international standards for reviewing interim financial information (NBC TR 2410 and ISRE 2410 – "Review of interim financial information performed by the independent auditor of the entity"). An interim review consists principally of applying analytical and other review procedures, and making enquiries of and having discussions with persons responsible for financial and accounting matters. An interim review is substantially less in scope than an audit conducted in accordance with auditing standards. However, due to the relevance of the matters described in the "Basis for disclaimer of conclusion on the individual and consolidated interim financial information" section of this report, we were unable to obtain proper and sufficient evidence to support our conclusion on the individual and consolidated interim financial information.

Basis for disclaimer of conclusion on the individual and consolidated interim financial information

Plea Bargain Agreement, Leniency Deal and Independent Investigation

As mentioned in Note 1 to the Quarterly Information, in May 2017, some executives and former executives of the Company and its parent company, J&F Investimentos S.A. (J&F), entered into plea bargain agreements with the Attorney General's Office (PGR), later blessed by the Supreme Court of Brazil (STF).

The agreements determine the payment, by those executives, of fines totaling R$ 225 million, and their cooperation with the Federal Public Prosecution Office (MPF), related to all facts reported to that authority, among other obligations. Also, in June 2017, J&F entered into a Leniency Deal with MPF. On August 24, 2017, MPF 5th Chamber blessed the Leniency Deal entered into and on October 11, 2017 the federal regular judge of the 10th Federal Court of Distrito Federal, on a justification hearing, also approved in court the mentioned deal. The Deal determines the payment of R$ 10.3 billion in 25 years to be paid exclusively by J&F and refers to the operations “Cui Bono”, “Carne Fraca”, “Sepsis” and “Greenfield”. On September 6, 2017, the Company joined the Leniency Deal, therefore avoiding the financial impacts of the Deal fully assumed by J&F.

The conduction of an internal investigation on the facts reported in the Plea Bargain Agreements related to the Company is one of the obligations established in the Leniency Deal. The Independent Supervision Committee of the Leniency Deal will have, among other functions, the responsibility of approving the service providers that shall conduct the internal investigations at the Company, as well as adjusting the respective work plans for the investigation. The expert professionals carrying out the investigations and respective work plans are both subject to validation by MPF.

During the third quarter of 2017 the investigation was initiated by means of expert professionals, external and independent from the Company.

Additionally, the Company did not disclose in its notes that on September 10, 2017, Joesley Batista and Ricardo Saul, parties of the Plea Bargain Agreements entered into with PGR, voluntarily gave themselves up to the Superintendence of the Federal Police. Their defense attorneys reinforced that the parties did not lie or omit information, pursuant to the Plea Bargain Agreements entered into with PGR, and that both rigorously met all requirements imposed. Despite that, the preventive detention of Joesley Batista and Ricardo Saud was requested. Later, on September 13, 2017, the Federal Judge of the 6th Federal Criminal Court of São Paulo, Dr. João Batista Gonçalves, issued a request for preventive detention of the Company’s shareholders, Wesley Batista and Joesley Batista, as a result of investigations on an alleged crime against the financial market for the use of privileged information.

In addition to the matters previously referred to, we highlight the following issues pending solution, and not fully under control of the Company, whose possible effects may result in significant changes to this Quarterly Information, as well as to the comparative financial information, including aspects related to insufficient disclosure of certain information in the notes:

- The evaluation carried out by Management is still preliminary, with no conclusion on the impacts of the Plea Bargain Agreements made public, later agreed in the Leniency Deal of J&F, which the Company joined to;
- There is complementary information presented by J&F to MPF, established in the Plea Bargain Agreement and in the Leniency Deal, not yet made public;
- The independent investigation required in the Leniency Deal with MPF was initiated monitored by the Independent Supervision Committee. On this investigation some of the Company's executives, signing the letter of representation from management issued to the independent auditor as part of the procedures for conclusion of the work of interim review, appear as custodians of data and information on this date.
- Although they are custodians of the information, it demonstrates that they are persons of interest to the internal investigation and they can possess relevant information.
- Because of its decision to join the Leniency Deal between J&F and MPF previously mentioned, the Company has no ongoing negotiations of deals with other Federal, State or Municipal authorities or entities, in respect of similar deals with these bodies related to the existence of other responsibilities or obligations not previously assumed;

- Because of its decision to join the Leniency Deal between J&F and MPF previously mentioned and effective only in local jurisdiction (Brazil), and for conducting business transactions and having investments in companies located in other countries, the Company is currently in contact and providing information only to the US Department of Justice (DoJ) regarding the independent investigations being conducted in JBS USA and its relevant controlled companies. As for other authorities from countries other than the United States, the Company and its controlled companies are not conducting any negotiations of deals, but are subject to possible investigations. The Company's management is not disclosing such investigations in other jurisdictions in this Quarterly Information.

Therefore, as a result of the limitations referred to above, we were unable to determine in the current circumstances the possible effects, if any and which may be generalized, of these matters on the Quarterly Information for the quarter ended September 30, 2017 and on the comparative financial information.

Review of the interim financial information of Seara Alimentos Ltda.

The review of the interim financial information of the controlled company Seara Alimentos Ltda. was conducted by other independent auditors who issued an Agreement on the Conclusion of the work of review of the interim financial information for the three- and nine-month periods ended September 30, 2017, dated December 18, 2017, and agreed with the management of the controlled company, which mentions the limitation of scope and the possible general effects on the interim financial information of the facts related to that controlled company and of the whole context previously mentioned, reported on the Plea Bargain Agreement and Leniency Deal entered into by J&F and MPF. Consequently, this Quarterly Information and comparative financial information of the controlled company may be subject to changes after the conclusion of these independent investigations, whose effects cannot be evaluated until the present date.

Adhesion to the Special Tax Regularization Program (PERT) and other commitments

As mentioned in Note 1 to the Quarterly Information, as at September 30, 2017, the Company and controlled company Seara Alimentos Ltda. partially offset certain tax obligations related to Social Security Tax (INSS), PIS, COFINS, Corporate Income Tax (IRPJ) and Social Contribution Tax (CSLL) recognized as a result of the waiver from tax proceedings filed with the National Treasury Attorney General (PGFN) and other tax debts against Income and Social Contribution tax losses from the Company and from other group companies, including Seara Alimentos Ltda. and some of its controlled companies, as permitted by Law No. 13.946 of October 24, 2017, addressing the PERT. However, the offset of the mentioned tax obligations against Income and Social Contribution tax losses, own or from controlled companies, is only permitted upon adhesion to the program, which occurred in October 2017, resulting in the write-off of assets and liabilities in advance and whose balances should be presented without the mentioned offset in the respective noncurrent asset and current and noncurrent liability accounts.

Consequently, current assets and liabilities are understated by R$ 136,955 thousand (Parent Company) and R$ 1,312,564 thousand (Consolidated) in the Quarterly Information as at September 30, 2017.

Additionally, in view of this legal permission to offset tax debts against income and social contribution tax losses, own and from other group companies', as referred to above, the Company entered into Agreements for Assignment of Tax Credits in September 2017 with several companies of its economic group, including Seara Alimentos Ltda., in order to formalize the commitment made of assigning the mentioned tax credits receiving in consideration amounts, receivables and/or assets of the Company. Accordingly, the Company and its controlled companies recorded the effects of this transfer as at September 30, 2017. However, as provided for by Law No. 13.946, this permission only occurs upon adhesion to PERT, which occurred only in October 2017. Consequently, current assets are understated by R$ 1,099,534 thousand, income (loss) and equity are overstated by R$ 76,075 thousand in the parent company, and in consolidated assets are understated by R$ 344,752 thousand and income (loss) and equity overstated by R$ 76,075 thousand in the Quarterly Information as at September 30, 2017.

Disclaimer of conclusion on the individual and consolidated interim financial information

Due to the relevance of the matters described in the “Basis for disclaimer of conclusion on the individual and consolidated interim financial information” section, we were unable to obtain proper and sufficient audit evidence to support our conclusion on the individual and consolidated interim financial information referred to above, in all material respects, according to Accounting Pronouncement CPC 21 (R1) and IAS 34, applicable to the preparation of Quarterly Information and presented according to the standards issued by CVM. Therefore, we do not express a conclusion on this individual and consolidated interim financial information.

Emphasis

Agreements to maintain credit lines

We draw attention to Note 15 to the Quarterly Information addressing stabilization agreements entered into with financial institutions and other contractual arrangements with covenants. Non-compliance with such agreements may have a significant impact on the Company’s operating activities. This matter does not modify our conclusion on this Quarterly Information.

Relevant legal and investigative procedures

We draw attention to Note 1 to the Quarterly Information addressing the several administrative, criminal and court proceedings against the Company in the context of CVM. An unfavorable outcome for these proceedings may have impacts on the Company. This matter does not modify our conclusion on this Quarterly Information.

Restatement of interim financial information as at September 30, 2016

We draw attention to Note 2 to the Quarterly Information, which describes the restatement of the individual and consolidated interim financial information of the Company for the quarter ended September 30, 2016, due to the correction of errors and review of certain accounting practices related to the matters described in the mentioned note. Our conclusion is not modified in respect of this matter.

Other matters

Interim statements of value added

We were also engaged to review the interim statements of value added (DVA) for the nine-month period ended September 30, 2017, prepared by the Company's Management, whose disclosure in the interim financial information is required in accordance with the standards issued by CVM applicable to the preparation of the Quarterly Information and considered as supplemental information by the IFRS, which do not require the disclosure of the Statement of Value Added. However, due to the relevance of the matters described in the "Basis for disclaimer of conclusion on the individual and consolidated interim financial information" section of this report, we were also unable to obtain proper and sufficient evidence to support our conclusion on this interim statements of value added in relation to the individual and consolidated interim financial information, taken as a whole. Consequently, we do not express a conclusion on the interim statements of value added referred to above.

The accompanying financial statements have been translated into English for the convenience of readers outside Brazil.

a. Adherence to the Special Tax Regularization Program (PERT):

The Company, as announced to the market in November 7, 2017, based on the Provisional Measure nº 783 dated May 31, 2017, converted into Law 13,496 of October 24, 2017, regulated by the Normative Ruling nº 1,711 of the Brazilian Federal Revenue ("RFB") from June 16 2017 and n° 1733 of August 31 2017, and by the Ordinance nº 690 from the Attorney General of the National Treasury ("PGFN") of June 29 2017, it has adhered to the Special Tax Regularization Program ("PERT") regarding tax liabilities related to PIS, COFINS and Income Tax/Social Contribution, registered or not registered in the Federal Debt Roster.

The nominal value of the debit included in PERT totals approximately R$4.2 billion, including reductions foreseen in the respective Provisional Measures, of which (i) 20% of the total gross amount will be paid in monthly installments until December 2017, totaling R$1.1 billion; (ii) amounts related to the RFB, totaling R$1.6 billion, will be paid using tax credits from the Company and other companies within the same economic group, which generated discount of R$76 million; and (iii) amounts related to PGFN, totaling R$1.5 billion, will be settled in 145 consecutive monthly installments, starting January 2018. Installment amounts include an 80% reduction in default interest, 50% in default fines and 100% in legal charges and will be adjusted by the SELIC rate. Adherence to PERT represents total savings of approximately R$1.1 billion.

Considering the net effect between the debits included on PERT, including the reductions and the provisions already established, the Company recorded a negative impact in the net income for the third quarter of R$2.3 billion, in which i) R$1.8 billion as expenses recognized under the caption "Administrative expenses"; ii) R$0.9 billion as expenses in the financial result; and, iii) R$435 million as deferred tax revenue for the constitution of unrecorded tax losses from prior period.

The effects related to PERT were recognized in the nine month period ended on September 30, 2017, since the definition of adhesion and debits to be included had already been taken at that time, and the amounts were already known and measured reliably, Management at September 30, 2017 was only waiting for the conversion of the Provisional Measure into Law, which occurred on October 24, 2017. PERT was recorded and segregated between administrative expenses (principal and fines) and financial result (interest), since these tax discussions were related to prior years and there is no benefit to readers in evaluate its recognition segregate in other lines in the statements of income.

(1) The Company believes that due to the origin and non-recurrence of specific events certain items should be excluded from the effective tax rate disclosure such as: i) deferred tax expense arising from goodwill amortization; ii) losses carryfowards from the current period; iii) income tax on realization of the other reserves (since it is not relate to the net operating income); iv) deferred tax assets on arising from prior years losses carryforwards (recognized only now that entities reach necessary criteria not observed in the past since on prior periods where such losses were generated, there were no expectation of profitable future profits); v) current tax over dividends paid abroad (once such expense is unrelated to our business);and iv) deferred tax prior year booking.

(2) In accordance with footnote 1, in order of PERT's adherence, the Company and its subsidiaries recognized deferred tax assets from prior years loss carryforwards in the amount of R$435,963 with the possibility of using the tax credits.

[1] Refers to balances from the subsidiaries JBS Argentina, JBS Paraguay, Frigorífico Canelones which were sold to the Minerva Group.

As of June 30, 2017, the Company and its subsidiary Seara had tax proceedings in the amount of R$6.5 billion, which in the Company's assessment were classified as possible loss, and there was no provision for such contingencies.

As disclosed to the market, and detailed in footnote 1 - Operating activities, the Company made an adhesion to PERT in the amount of R$4.1 billion, of which R$2.6 billion was included in the aforementioned possible estimate, and the remainder of the balance was evaluated between probable and remote risk.

It is important to note that part of the R$2.6 billion of possible valuation was recorded as INSS payable in the amount of R$2.3 billion (including fines and interest) that had been offset against PIS and COFINS, and was being discussed together with tax authorities.

At the time of PERT's adhesion, the INSS offset with PIS and COFINS was reversed, therefore resulting in no effect on the statements of income.

There was no change in the Company's estimate of the risk of loss in these proceedings, however, even such debts being under discussion and with technical arguments of success, the Company decided to join PERT due to the benefits of the program, such as the use of tax credits, discounts and reductions (approximately R$1.1 billion), the extended term for payment, and the cost of the lawsuit (both financial and procedural).

After joining PERT, on September 30, the balance of lawsuits classified as possible was R$3.1 billion.

20 Equity

a. Share capital: There were no changes on the balances at September 30, 2017.

b. Share-based compensation:

The Company has a stock option plan settled in shares. The Company grants stock options to employees as an incentive intended to create a sense of ownership and personal involvement with the development and financial success of JBS. Executive officers, directors and general managers are eligible to receive stock options under the plan. The Company’s Chairman determines the criteria of granting the options and selecting the employees. The number of grantable shares authorized under the plan is limited to 2% of the Company’s share capital, and also limited to 0.4% of the increase in the Company’s share capital per year.

The fair value of employees’ services received in exchange for the stock option grants is recognized as an expense in the statement of income with a corresponding entry in capital reserves. The total amount of expense is recognized during the period in which the right to exercise the stock option is acquired, which generally occurs when the option vests, and is equal to the grant date fair value of the underlying options granted. The number of stock options that each employee is entitled was calculated based on the average of the Company’s stock price for the three months prior to the grant date. The stock option may only be exercised upon satisfaction of the service condition, and have the maximum term of ten years varying in accordance with each individual agreement. All options must be exercised by physical delivery of the shares of common stock.

At the reporting date, the Company reviews its estimates of the number of options, which will be exercised (not forfeited), and recognizes any impact from the change in estimate in the statement of income, with a corresponding adjustment to capital reserves within stockholders’ equity. The fair value of each stock option granted was estimated at the grant date based on the Black-Scholes-Merton pricing model. The primary assumptions considered in the model were:

From May 2015, the Company has only one category of potential common shares that would cause dilution: outstanding options to purchase shares (shares in thousands).

	For the nine month period ended September 30,		For the three month period ended September 30,

The Company includes the net debt of foreign subsidiaries in the disclosure of economic hedging exposure. Although these debts do not generate foreign exchange gains or losses because the debt is denominated in the functional currency of each country, these debt instruments are translated to Brazilian Reais in consolidation and are therefore affected by exchange rate variation, which impacts the Company's consolidated leverage ratios.
